

Land-use practices and effects

# ***What's accelerating erosion?***

***Roads***

***Fencelines***

***Cattle pads***

***Weeds***

***Changed fire***

***Over grazing***

***Intensive hort***

Many of the big problems in the Normanby are caused by an accumulation of small problems.

Each fenceline gully, every flogged paddock, and all the poorly managed fire...it adds up to seriously big problems.

There are no big answers. We are a community of farmers, graziers, and people on country. These problems are our responsibility. We need to make lots of small improvements...it all adds up!

***Are your practices increasing or reducing erosion?***
